Some courses have special requirements for the admission.
You can look that up at the bottom of the course's description.

Admission settings

The course is part of admission

The following admission rules apply:

- The following categories of persons are preferred during allocation:
Higher semesters will be preferred.
- This setting is active from _____ to _____
It is allowed to enrol to max. _____ courses in this admission.
- A defined number of seats will be assigned to these courses.
The seats will be assigned in order of enrolment.
- The enrolment is possible from _____ to _____

Assignment of courses:

-
-

Enrollment blocked

➔ Access to the event is only possible after activation (by the system)

Enrollment with password

➔ A password is required to access the course. Usually the lecturer announces the password beforehand or during the first lesson.

Timed enrollment

➔ Accessing the course is only possible during a certain time frame. Access is blocked outside the time frame.

Limited number of participants

➔ Only a certain amount of students are allowed to enroll for the course. The selection can depend on the time you apply or further criteria (semester, major etc.).

Various enrollment procedures can be combined with each other.

Therefore, it is possible that a course has a limited number of participants and a chronological enrollment procedure as well.

3.1 Stud.IP – raffle courses

If a course belongs to a registration set, you must prioritize it yourself. In doing so, you determine a ranking of courses that is desirable to you. The distribution of the seats is done automatically.

i Seats in this course are assigned automatically.

- The course is part of an admission with 9 courses. You may enroll to 1. Your priorities will be accounted for.
- Date of assignment: 26/03/15 09:00:00
- You have already been registered for assignment.

I apply for the following number of courses:

Drag and drop your choice to the right side and sort them by priority (most desired at the top). You can drag more courses than you really want to participate in.

4.2 LRZ Sync+Share

The Leibniz Computing Center of the Bavarian Academy of Sciences (LRZ for short) offers online storage for employees and students of participating universities. You can access your online storage via: syncandshare.lrz.de/login

<https://syncandshare.lrz.de/login>

To log in to a pool PC you need your ZIM-username.

Important: Your data on the desktop and on the C: drive will be deleted after logging out on the PC!

Please back up your data, e.g. to your H: drive.

The opening hours of the PC pools are linked to the opening hours of the building.

www.hilfe.uni-passau.de/en/office-pcs/computer-rooms

You can **print**, **copy** or **scan** your documents using the multifunction printers/copiers distributed throughout the campus - the so-called campus printers.

- The campus printer is already installed in the PC pools.
- You are welcome to install the campus printer manually and use it e.g. on your private PC.

www.hilfe.uni-passau.de/en/office-pcs/printers-and-scanners

If you are in the university network, you only need your CampusCard. There are card terminals on the campus, where you can charge credit for the campus printers to your CampusCard. (Note: this does not refer to terminals used to revalidate your campus card!)

You can also use the campus printers from private computers via WLAN (OpenVPN, eduroam). You need both the CampusCard and the corresponding printer driver for campus printers.

E-Mail

All students of the University of Passau receive a personal e-mail account. The institutions of the University will send all information concerning your studies to your student e-mail address.

Therefore, check your e-mail inbox regularly!

With the help of the web-based access, the Outlook Web Access (OWA), you can easily retrieve your e-mails from any (mobile) Internet-enabled device: email.uni-passau.de

For registration at the student's e-mail system you need:
your username (**ZIM-account** user01@ads.uni-passau.de)
your password

www.hilfe.uni-passau.de/arbeitsplaetze/e-mail/e-mail-fuer-studierende

Currently there are **three types** of student e-mail addresses (aliases only!):

➡ *@ads.uni-passau.de*

➡ *@gw.uni-passau.de*

➡ *@stud.uni-passau.de*

All of these can be accessed via email.uni-passau.de

Please note that the sender of a student e-mail address is ALWAYS
@ads. uni-passau.de!

<https://email.uni-passau.de>

WHERE ARE MY E-MAILS? WHY ARE THEY NOT IN STUD.IP?

Stud.IP is **not an e-mail inbox**. Here you will receive notifications or internal messages from courses.

Access via:
studip.uni-passau.de

Detailed instructions with screenshots on how to forward your Stud.IP messages to your student email address can be found here:

Outlook is your student e-mail inbox. Here you will receive important e-mails e.g. from the administration and you can also send e-mails yourself. Your student e-mail address is:
muster06@ads.uni-passau.de

Access via:

Detailed instructions with screenshots on how to forward your student emails to your private email address can be found here:

You can access your mailbox in several ways:

Outlook Desktop App

If your device has the **Outlook Desktop app** installed, you can access Outlook from it.

Outlook Web Access

With the help of **Outlook Web Access (OWA)**, you can retrieve e-mails conveniently from your mobile device.

Mobile devices

You can receive your e-mails via your **mobile devices**.

IMAP & SMTP

You can also access your e-mail **with other e-mail programs** besides Outlook (such as Thunderbird).

You can use a rule to **redirect or forward** your e-mails to a **private e-mail address**.
The help portal explains the procedure step by step.

Forward: The e-mail will be redirected in the same way as if the “forward” option had been selected directly in Outlook. This means that the e-mail is changed when it is forwarded (subject is adjusted, message text is inserted as a quote).

Redirect: The e-mail is sent directly to the recipient (no change visible). For the recipient, it looks as if the sender sent the e-mail directly to him.

www.hilfe.uni-passau.de/arbeitsplaetze/e-mail/outlook/funktionen-und-module/e-mail

Beforehand you may switch to an english version of your e-mail reader:

“Phishing” for passwords involves fishing for passwords and confidential data in supposedly legitimate e-mails. The scammers either ask you to click on a link as quickly as possible or to enter the data directly in the e-mail. Do not enter any data and do not click on any links as soon as you have doubts about the seriousness of an e-mail. If in doubt, ask us first.

Signs:

- Impersonal form of address
- Suspicious e-mail address
- Suspicious link
- Time pressure
- Threats

www.hilfe.uni-passau.de/en/office-pcs/e-mail/security-and-spam-protection

PLEASE NOTE: The name as well as the e-mail address of a sender **can be faked by scammers**. Phishing e-mails can therefore look as if they have been sent by supposedly high-ranking persons of the University of Passau.

A common scam used by scammers is to pretend to be an employee of the university and ask you to buy vouchers (e.g. Amazon, Google Play, etc.).

Therefore, always **be suspicious** if you receive such e-mails and **do not reply** to them!

www.hilfe.uni-passau.de/en/office-pcs/e-mail/security-and-spam-protection

The university offers you three **WiFi networks**:

- CampusUniPassau (used to setup eduroam and for VPN on campus)
- Eduroam (standard wireless network on campus)
- BayernWLAN (no registration needed, very simple)

Problems with eduroam or CampusUniPassau WiFi?

BayernWLAN always works! Its bandwidth might be limited though.

The platforms of the Digital Campus are freely accessible via the Internet. No access to the campus network is required!

www.zim.uni-passau.de/dienstleistungen/netzwerk-und-server/netzwerkzugang/zugriff-auf-wlan

When you connect to WiFi network CampusUniPassau you should get this:

Purpose 1:
Setup eduroam

Click this to setup eduroam!

Don't use this! It probably won't work :D

Purpose 2:

Hint: on macOS and iOS/iPadOS devices this tends to be tedious. It might take some time and patience until this screen appears.

for common operating systems!

www.zim.uni-passau.de/dienstleistungen/netzwerk-und-server/netzwerkzugang/zugriff-auf-wlan

- When installing your certificate you'll need to enter a password - beware! Enter only your ZIM account id (e.g. sample01) – **NOT your id's password, use only lowercase characters!**
- **Windows:** we only support **Windows 10 and up**. Use the tool provided on our website to install the certificate.
- **iOS:** you'll need to **install** your certificate in Settings > General > Profiles & Device Management
- **macOS:** make sure to update to the **current macOS**, macOS 11 and above should be fine!
- **Android:** Certificate's purpose: choose **WLAN/WiFi – NOT VPN**
- **Android:** When asked for a domain, enter **uni-passau.de**
- **Android:** When prompted for your identity, enter **ZIM-Kennung@uni-passau.de** – e.g. sample01@uni-passau.de – beware: this is not a valid E-Mail address in Passau, it is just a “placeholder” in this case! Make sure there is no **SPACE** after the last characters .de!

- BayernWLAN is usually easy to use, no setup required. Its bandwidth (speed) might be limited though.
- You need to agree to Vodafone's terms and conditions – this tends to cause issues on Apple products (e.g. Macbooks)
When affected: open Safari and enter this address:
