

Is Palm Oil Production sustainable? Insights from Indonesia

29 September 2022, 15h30-17h30
HS 12 IM, Innstrasse 33, 94032 Passau
University of Passau

How (un)sustainable is Palm Oil Production?

Matin Qaim, Professor at the University of Bonn and Director of ZEF Bonn

Adoption of Indonesian Sustainable Palm Oil (ISPO) practices in Jambi, Sumatra

Herman Waibel, Professor at the University of Hannover

Discussion

Siti Amanah, Associate Professor and Vice-Dean at the IPB University, Bogor, Indonesia

Opening and Event Moderator

Michael Grimm (University of Passau)

Matin Qaim is Director of the Center of Development Research at the University of Bonn. He is a food systems and development economist and a member of the German National Academy of Sciences (Leopoldina), Fellow of the American Agricultural and Applied Economics Association (AAEA), and President-Elect of the International Association of Agricultural Economists (IAAE). He has served on different high-level expert committees, including for the Global Panel on Agriculture and Food Systems for Nutrition, and the German Federal Government and Parliament.

Hermann Waibel is a Professor of Development and Agricultural Economics at the University of Hanover. He is an expert on land use systems and agrarian transformations in developing countries. Previously he held academic positions at the Asian Institute of Technology (AIT) in Bangkok, Thailand and at the Bureau of Plant Industry in Manila, the Philippines. He is the Coordinator of the Research Unit 756 on "Vulnerability to Poverty in emerging economies in South East Asia", funded by the German Research Foundation (DFG).
